Society for Continence (Singapore)

Continence Management Course 2026

Welcome to Continence Management Course, a 2.5-day program designed to provide healthcare professionals with a comprehensive and practical understanding of urinary function and dysfunction. This event covers the anatomy and physiology of micturition, key types and consequences of urinary incontinence, overactive bladder, and the management of neurogenic and stress urinary incontinence. Emphasis is placed on clinical assessment through structured history taking, physical examination, bladder diaries, and urodynamic evaluation. Interactive workshops will strengthen practical skills in patient assessment, documentation, and diagnostic interpretation, bridging theory with real-world clinical practice.

27 - 29 Aug 2026
